

SplashLight®

BIOTOY LAUNCHES THE WORLD'S FIRST
GLOWING WATER BLASTER

The toy of the future is here!

Light up the night or any dark room with a liquid laser splash! This revolutionary toy uses all-natural bioluminescence to create a 30 foot blast of actual glowing water.

The SplashLight® blaster uses proprietary co-activating Glow Dots to create glowing water in our dual-chambered blaster. SplashLight® toy technology was developed by scientists extracting natural bioluminescent elements - like the glow of a firefly or deep-sea organism.

Fun for kids 8 years and older!

**SAFE and
NON-TOXIC**

**LEAVES
NO RESIDUE**

**ALL-NATURAL
BIOLUMINESCENCE**

TOY FAIR NY BOOTH # 4114
MSRP \$24.99
