

STEAM Lab Kits

STEAM is known by parents and teachers to help kids develop problem solving skills while learning and exploring their love of the sciences. These **NEW Crayola STEAM lab kits** are not only educational but fun. Each kit is designed to teach kids various science experiments behind three different themes: Liquid, Space and Wicking Paper Flowers using water-based experiments.

Product Descriptions

- **Liquid Science Lab Kit:** Kids learn about the wet and wonderful world of water and liquids as they create and conduct water-based experiments.
 - 15 ready to go experiments from the box and with common household items
- **Space Science Lab Kit:** Kids learn about planets, stars, eclipses, meteors and more when they create a colorful and full-scale solar system.
 - 15 ready to go experiments from the box and with common household items
- **Paper Flower Science Lab Kit:** Colors bloom before your very eyes! Using the magic of physics and capillary action, this hands-on educational toy lets kids learn about the science of water "wicking" as they create colorful paper flowers.
 - Includes 12 flowers that can "re-wick" color over and over to change look and design

Target Audience
