## Griddly Games' Just Adds Sun for a Solar Powered Oven

New York, NY - (February 10, 2016) - The product development lab at Griddly Games has been very busy getting ready to Just Add some ingredients to its STEAM line of products.

**Just Add Sun** (MSRP \$25.98 for ages 5 and up) is a "hot" new solar oven that uses the sun's energy to heat up tasty treats. The product includes directions to melt s'mores, make nachos, or even cook an egg, among many other activities that all use the power of the sun. With the Just Add Sun Solar Science and Art Kit you can learn how solar energy works and eco-friendly energy alternatives. See how the energy of the sun can be used for heating and cooking, and experiment with light, heat transfer, reflection, and more! Griddly Games has even included 'upcycle' items to create fantastic art!

Last year, Griddly poured out a cool new entry into the STEM product category with its Just Add Milk science activity craft kit. The product was embraced by all of the science and craft curious attendees at Toy Fair and quickly became Griddly's most successful product launch. This year, the company is "add"-ing two more STEM style kits with its Just Add Sun and Just Add Glue.

**Just Add Glue** (MSRP \$16.95 for ages 6 and up) is the exciting new science activity kit that is sure to stretch the imagination! Use this cool new kit to create different forms of super stretchy polymers and make them bounce! By creating gluey gooey putties that can be picked up, stretched, and even rolled into a ball that bounces. Experimenting with the Just Add Glue kit let you mix separate batches of varying amounts of two main ingredients to witness the difference that consistencies can make. The product allows an underlying lesson about states of matter including liquids and polymers. It's a basic introduction to chemistry and material engineering

Reisa Schwartzman, founder and president of Griddly Games, said, "We are so excited about this year's Toy Fair. We are 'add'-ing new products, that expand off of our Just Add Milk science and craft activity kit."

Just Add Sun and Just Add Glue join Griddly Games' family of award winning products that include Just Add Milk, Show Me The Kwan, Wise Alec™ board game, Wise Alec™ Junior, Wise Alec™ Expansion Packs (Body Works, Bright Ideas, Civilize This, Nature Nuts, and Sports Buffs), Oversight, Rainbows and Storms, Words of the Wise and Chronicles of the Mind, and the company's Griddly Headz™ NASCAR®, Baseball and Hockey sports-themed games.

**About Griddly Games:**

Griddly Games *get you going*. The company, based in Richmond, near Vancouver, British Columbia, creates award-winning games and activity kits for kids that deliver innovative, engaging fun that brings people together. Founded in 2007 by Reisa Schwartzman, a mother of three boys, who took it upon herself to deliver wholesome family fun that multiple ages could enjoy at once, Griddly Games offers products that inspire laughter and fun, while promoting an active and healthy lifestyle. Griddly Games instill a strict company philosophy to encourage social interaction, learning, strategy and challenges that anyone (*from across the grid*) can enjoy.
