

Jurassic Park™ Danger! Game

Hunt as the Dinosaurs... or survive as the Humans!

The first visitors have arrived at Jurassic Park™ to see its miraculous dinosaurs firsthand. But chaos has hit Isla Nublar—the power is out, and the prehistoric creatures are on the hunt! One player controls the T. Rex, Dilophosaurus, and Velociraptor, prowling through the jungle to attack the humans. The other players team up as characters from the classic movie, struggling to get Jurassic Park™ back online and escape the island before they become prey!

Highlights:

- Based on original Jurassic Park™ film --including iconic players and stunning modular Isla Nublar game board!
- Asymmetric gameplay gives one player the chance to be the savage dinosaurs, while the other players work together to outsmart them.
- Ten different fan-favorite characters have their own unique objective, providing endless replay value and variable strategies.
